DETAILED ACTION

Acknowledgement is made of the IDS and the Preliminary Amendment filed 04/26/01 and the IDS filed 01/08/02.

Claims 1 and 5-30 are pending. Claims 1 and 5-30 are subject to a restriction requirement. Claims 2-4 have been cancelled.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 6-20, drawn to a solid preparation coated with a continuous film coating layer, classified in class 424, subclass 490.
- II. Claim 5, drawn to a solid preparation treating apparatus for yielding a continuous film coating layer, classified in class 118, subclass 624.
- III. Claims 21-27, drawn to a process for preparing a solid preparation coated with a continuous film coating layer, classified in class 118, subclass 624.
- IV. Claims 28-30, drawn to a film coating agent capable of forming a film coating layer on a solid preparation, classified in class 424, subclass 490.

Inventions of Group I and II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as

Art Unit: 1615

claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the apparatus can be used for treating other solid preparations, such as the radiation curing of polymer films on a metal substrate and the solid preparation can be prepared by means other than the apparatus, such as by use of a heated chamber.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II, III and IV, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Groups I, III and IV, and so forth for the remaining groups, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
